| <b>CHAPTER 10</b>                                         | <b>105</b> |
| MDR Overview - Articles                                   | 105        |
| Article 1: Subject Matter and Scope                       | 106        |
| Article 2: Definitions                                    | 108        |
| Article 3: Amendment of certain definitions               | 110        |
| Article 4: Regulatory status of products                  | 111        |
| Article 5: Placing on the market & putting into service   | 112        |
| Article 6: Distance sales                                 | 114        |
| Article 7: Claims                                         | 115        |
| Article 8: Use of harmonised standards                    | 116        |
| Article 9: Common specifications                          | 118        |
| Article 10: General obligations of manufacturers          | 120        |
| Article 11: Authorised representative                     | 125        |
| Article 12: Change of authorised representative           | 127        |
| Article 13: General obligations of importers              | 128        |
| Article 14: General obligations of distributors           | 129        |
| Article 15: Person responsible for regulatory compliance  | 130        |
| Article 16: When Manufacturer obligations apply to others | 132        |
| Article 17: Single-use devices and their reprocessing     | 134        |
| Article 18: Implant card and information to be supplied   | 135        |
| Article 19: EU declaration of conformity                  | 136        |
| Article 20: CE marking of conformity                      | 138        |
| Article 21: Devices for special purposes                  | 139        |
| Article 22: Systems and procedure packs                   | 141        |
| Article 23: Parts and components                          | 143        |
| Article 24: Free movement                                 | 144        |
| Article 25: Identification within the supply chain        | 145        |
| Article 26: Medical devices nomenclature                  | 147        |
| Article 27: Unique Device Identification system           | 148        |
| Article 28: UDI database                                  | 150        |
| Article 29: Registration of devices                       | 151        |
| Article 30: System for registration of economic operators | 153        |

|                                                               |     |
|---------------------------------------------------------------|-----|
| Article 31: Registration of Economic Operators                | 155 |
| Article 32: Summary of safety and clinical performance        | 157 |
| Article 33: European database on medical devices              | 159 |
| Article 34: Functionality of Eudamed                          | 161 |
| Article 35: Authorities responsible for notified bodies       | 162 |
| Article 36: Requirements relating to notified bodies          | 164 |
| Article 37: Subsidiaries and subcontracting                   | 165 |
| Article 38: Application by CABs for designation               | 166 |
| Article 39: Assessment of the application                     | 167 |
| Article 40: Assessment of applications for notification       | 169 |
| Article 41: Language requirements                             | 171 |
| Article 42: Designation and notification procedure            | 173 |
| Article 43: Identification number and list of notified bodies | 174 |
| Article 44: Monitoring and re-assessment of notified bodies   | 175 |
| Article 45: Review of notified body assessment                | 176 |
| Article 46: Changes to designations and notifications         | 177 |
| Article 47: Challenge to the competence of notified bodies    | 178 |
| Article 48: Exchange of experience between authorities        | 179 |
| Article 49: Coordination of notified bodies                   | 180 |
| Article 50: List of standard fees                             | 181 |
| Article 51: Classification of devices                         | 182 |
| Article 52: Conformity assessment procedures                  | 184 |
| Article 53: Notified bodies in conformity assessment          | 186 |
| Article 54: Clinical evaluation consultation procedure        | 187 |
| Article 55: Mechanism for scrutiny of conformity assessments  | 189 |
| Article 56: Certificates of conformity                        | 190 |
| Article 57: System on NBs and certificates of conformity      | 191 |
| Article 58: Voluntary change of notified body                 | 192 |
| Article 59: Derogation from conformity assessment             | 193 |
| Article 60: Certificate of free sale                          | 194 |
| Article 61: Clinical evaluation                               | 195 |

## CHAPTER 3

---

# HOW TO USE THIS GUIDEBOOK

As mentioned in the welcome chapter, this book is not meant to be read from cover to cover, it is a set of tools and references that you can use to ensure you have met the requirements of the MDR.

The book is broken into chapters that represent different tools you can use. Colour coding is used to aid navigation and each section of the book has a different coloured bar on the outside margin of the page to allow quick referencing. The colour coding of each tool is represented by the coloured line under each tool description below.

The starting point for most users of this guidebook will be Chapter 4 - Compliance Guide, which identifies what a manufacturer needs to do to comply with the MDR, from there, the tools can be navigated as required. The tool sets are as follows:

### **COMPLIANCE GUIDE:**

---

The compliance guide is the starting point to aid compliance with the MDR. It provides an overview to the requirements of the MDR and helps a manufacturer build the documentation required to demonstrate compliance. This section also includes a list of 14 things that should be considered by a manufacturer.

### **DEVICE CLASSIFICATION**

---

This lists the rules for classification and identifies what has changed from the Medical Device Directive. There is also a small section describing the type of devices that rule is intended for.

### **CLINICAL EVALUATION**

---

This section provides some guidance on the requirements for clinical data and also has a notified body inspired checklist. This is a very large subject, so it provides a basic overview to help you get started.

### **CONFORMITY ASSESSMENT ROUTE ANNEXES:**

---

This section provides a tabular view of the conformity assessment routes. It is a comparison tool that you can use to identify a preferred conformity route and the associated requirements.

### **QMS TABLES:**

---

This chapter provides a set of useful tables that links the requirements of a Quality Management System to the requirements of the MDR, this can be used to ensure that your QMS procedures meet the necessary requirements.
